CLEANING BATH FOR BI-METAL AND CUPRO-NICKEL COINS

#343206

The cleaning bath deoxidizes and cleans **bi-metal and cupro-nickel coins**, for example Australian 5, 10, 20, 50 cent, and 1 and 2 dollar coins. Stuck-on dirt and grease stains should be treated with the **LIGHTHOUSE MILD CLEANING BATH FOR ALL COINS #318851** first.

Instructions for use:

1. Place the coins into the basket and lower into the bath.
2. Make sure that multiple coins do not touch each other.
3. Coins with low levels of oxidation will be clean after 1 minute, whereas more oxidized coins take 3 to 5 minutes.
4. The immersion time may be extended for particularly tarnished coins.
5. Observe the coin at all times and do not immerse it for longer than necessary.
6. After cleaning, remove the basket with the coin and rinse thoroughly under running water.
7. Pat the cleaned coin dry with a soft cloth.
8. Do not rub.
9. Remove liquid after use.

USE TO CLEAN

Bi-Metal and Cupro-Nickel Coins

IMPORTANT NOTICE!

DO NOT USE on gold, silver or fully copper, brass and bronze colored coins.

DO NOT rub the coin when drying

CAUTION

Keep out of reach of children.
